

The next generation power actuated
wedge connector

sicame

The EZ Wedge® is an Easy to install power actuated wedge type connector for bare overhead conductors.

This advanced next generation power actuated wedge connector is completely self-contained, eliminating cartridge selection and the need for specialized tools, for an EZ installation.

Installing taps with the EZ Wedge® is much quicker than conventional wedge, bolt, or compression type connectors.

Installation overview

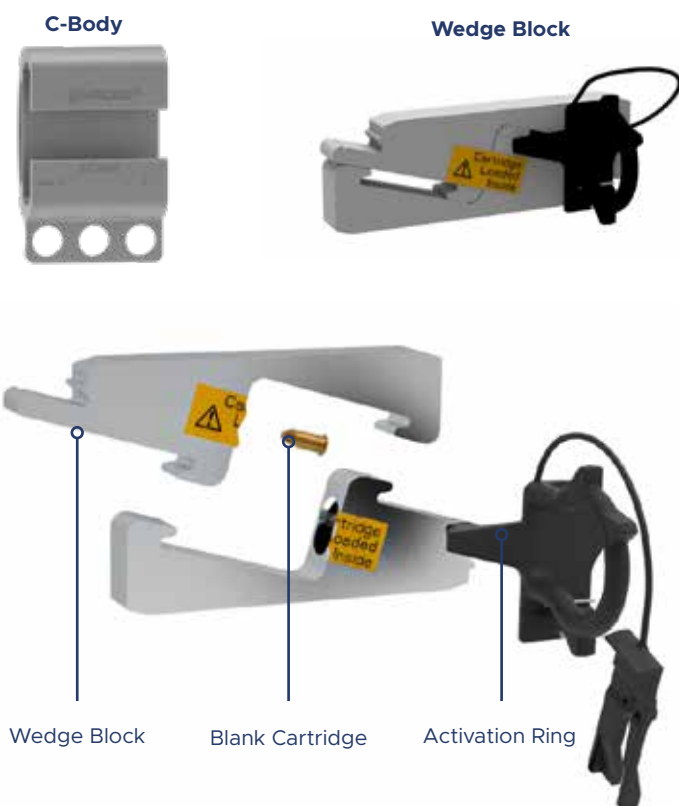

World's easiest connector!

Application

The connector is made of aluminum alloy and can be used with any combination of AAC, ACSR and AAAC conductors. Copper conductor or bail can be used in the lower tap position only. It may be used to connect multiple conductor combinations.

The connector is comprised of two parts, the C-Body, and the Wedge Block. The power actuator, a 22-caliber blank cartridge, comes factory installed in the Wedge Block.

EZ Wedge Range

A large range available for most conductor combinations available in two variants.

EZ Wedge Regular
from #4 to 1033
MCM Main & Tap

EZ Wedge with bail
from #4 to 1033
MCM Main
To #2 to 4/0 Bail

Benefits

- Easy, Fast & Safe installation
- Ready to use
- Glove and hotstick friendly installs

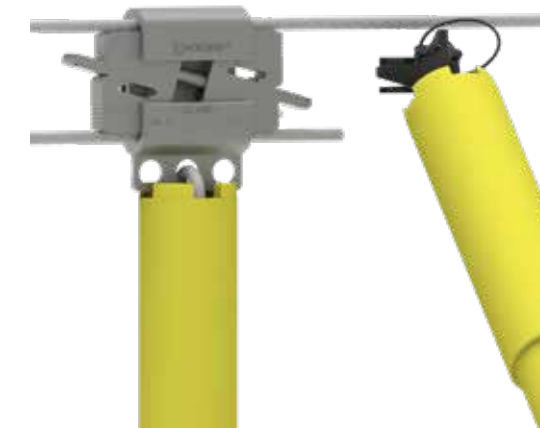

- No special tools needed
- No selection of the proper actuator charge
- Efficient, time saving

- Easy self check of installation
- Quiet when discharged
- No cartridges or tool management

Features

- Several safety features prevent premature discharge until the Wedge Block is placed in the C-Body.
- When discharged, the C-body vertical, spring-compressive force creates full and uniform contact on the main and tap conductors.
- Anti-slide ribs of the wedges and grooves in the C-body maintain proper contact for a good electrical connection.
- The C-Body has an abrasive anti-oxidation grease pre-installed that aids in assuring proper electrical contact.
- Can be installed with hot stick or gloving procedures.
- A removal tool is available.
