

Pole capacitor rack

The smarter choice for pole-mounted capacitor installations

The pole capacitor rack is designed for reliable mounting of capacitor banks on distribution poles. Built from high-strength aluminum, it combines lightweight construction with a high safety factor, ensuring long-term durability and adaptability across multiple capacitor brands and configurations.

Main features:

Flexible Configuration

Durable Construction

Versatile Compatibility

- Accommodates 3 to 6 capacitors, 3 vacuum switches, and a single pole-mounted transformer
- Engineered with a robust bolted design for enhanced stability and ease of installation
- Supports a wide range of capacitor brands including Eaton, Hubbell, ABB, and more

Technical specifications:

Specification	Specifications
Dimension (Inch)	62.59 (L) 8.62 (B) H:14.75(H)
Load Rating	1350 lbs
Pole diameters (Inch)	∅ 6 to 15
