

Cat’s Claw Wire Fastener

Cat's Claw is a reusable wire fastening solution designed to hold and guide grounded conductors across wooden structures. Its curved shape grips the wire while its metal claw edges and self-tapping screw secure the assembly to the post. Installed with an impact driver, Cat's Claw helps simplify installation, repairs, repositioning, and replacement work.

Product	Screw Size	Finish	Conductor Range	Intended Environment
K-315-TDG	#10 - 1-1/2" x 11/16"	ArmorGalv	#8 to #2	Corrosive
K-320-TDG	#10 - 2" x 11/16"	ArmorGalv	#8 to #2	Corrosive
K-315-DAC	#10 - 1-1/2" x 11/16"	Dacromet	#8 to #2	Standard
K-320-DAC	#10 - 2" x 11/16"	Dacromet	#8 to #2	Standard

Product overview and applications

- Replace traditional steel staples for the versatility and reusability of Cat’s Claw.
- Secure single or multiple grounded wires to wood poles.
- Replace missing or loosened staples on wooden poles or crossarms.
- Applicable for copper, aluminum, and steel wires.

Product key features

- **Simplified installation -** ease and accuracy of an impact driver and screw.
- **Reusable and adustable -** remove, reposition, and reuse the fastener when installation conditions change or repairs are required.
- **Suitable for repair work -** practical for replacing missing or loose staples and reattaching wire to older weathered wood.

Cat’s Claw	Standard U-Shaped Staple
Controlled installation with impact driver & screw	Installed with hammer, often results in damaged wire
Easily repositioned, removed and reused	Removal often damages both wire & wood, and renders staple unfit for reuse
